Re Bureau letter dated 4/14/72 authorizing interview of Subject. Interview conducted 5/23/72 by SA KEITH G. TRETER in accordance with instructions set out in referenced Bureau letter.

Although it had been assumed ROBINSON would logically be acquainted with the other scientists named in San Francisco letter 3/30/72 and would have participated in COSPAR meetings with them, this was not the case. ROBINSON advised he went to the meetings at his own expense and on his own time to hear reports of observations of an eclipse of the sun made in Mexico in May, 1971. He explained that astronomy is one of his hobbies and that he had been able to participate in the observations in Mexico in May. Inasmuch as eclipses are of interest in outer space research, it was decided to combine reports of the Mexico observations with other aspects of space research in the COSPAR proceedings. His presence there was purely personal and he did not represent the Lawrence Berkeley Laboratory or any other research facility. ROBINSON advised he was not personally acquainted with any of the other delegates to COSPAR from this area and had not met anyone he knew in Seattle. In view of the international participation at the meetings, delegates were there from all over the world.

b7E

It is noted other delegates to COSPAR from this area identified in San Francisco letter 3/30/72 are highly placed scientists employed by the University of California at Berkeley having academic research or administrative responsibilities with the exception of MARK ANTHONY CHATIGNY, who is a research engineer
